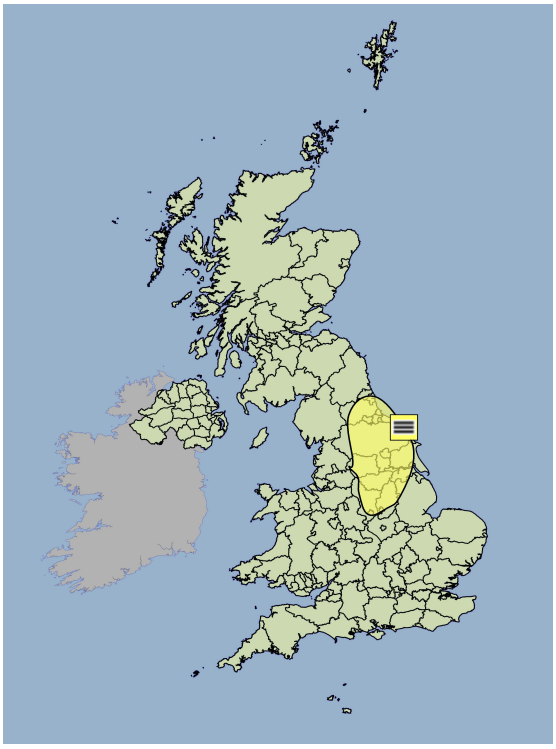
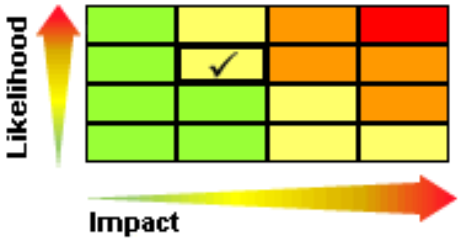
National Severe Weather Warning Service





Chief Forecasters Assessment
A ridge of high pressure across central areas of the UK will lead to light winds and clear spells overnight, a recipe like the last two nights for areas of locally thick fog to develop, which will take until late morning on Tuesday to clear in some places.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **01:00 on Tue, 29th Sep 2015** until **11:00 on Tue, 29th Sep 2015**

Fog is expected to become fairly widespread across much of northeast England and parts of the northeast Midlands again overnight and into Tuesday morning, with the visibility falling below 100 metres in places and leading to difficult driving conditions. The fog will thin and lift slowly later in the morning.
